### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with John Doherty on April 26, 2004.

The application has been amended as follows:

In claim 1, the second to the last line, please change "can be" to --are--;

In claim 14, line 2, please change "13" to --12--.

Please rewrite the Abstract as follows:

An improved roll-up truck cover assembly is provided for use on trucks having a rectangular open truck body ~~carrying gravel, loose dirt and the like.~~ The roll-up truck cover assembly ~~comprises~~ includes a rectangular flexible top cover attached at one end to the front wall and at the other end to a take-up roll including a biasing member tending to rotate the roll in a take-up operation. A pair of elongated swinging arms are provided on each opposite side wall of the truck body. ~~The swinging arms may comprise, for example, a first or upper elongated tube red rotatably connected at one end to the take-up roll. The first or upper elongated tube or rod is telescopically and retractably mounted at its other end within a second or lower larger diameter tube pivotally mounted to a lower end portion of one of the side walls of the truck body. A roller and an elongated roller guide track are provided for each swinging arm on each opposite side wall of the truck body. Each roller is rotatably mounted onto a shaft which is attached to the first~~

~~or upper tube of each swinging arm and are movably engaged within each of the guide tracks.~~

~~Means are provided for pivotally moving the swinging arms along the opposite side walls of the truck body in an arch-like manner from one to the other opposite end of the truck. The take-up roll and top cover travel along with the swinging arms and the cover is unwound from the take-up roll in one direction covering the open end of the truck body and then wound onto the take-up roll in the opposite direction during the take-up operation. The rollers move along the guide tracks in a straight longitudinal path causing the a first or upper tube or rod to retract within the a second or lower tube, keeping to a minimum the height to which the take-up roll and top cover can be are raised above the truck.~~

2. The following changes to the drawings have been approved by the examiner and agreed upon by applicant: Please add the --Prior Art-- label to Figures 9 and 10a, please include an arrowhead at the end of the lead line for reference characters 40 and 42, and please add reference character 33 to Figure 8. In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.

3. The following is an examiner's statement of reasons for allowance: The primary reason for the allowance of the claims in this application is that the prior art of record does not disclose or suggest a roll-up truck bed assembly in combination with the truck bed including a pair of telescoping swing arms one of each of which is positioned adjacent one of the side walls of the truck body, the swinging arms including a pair of rollers one of each which is rotationally mounted onto one of a pair of shafts, each one of the shafts being attached to a first elongated member of the swinging arms and a pair of elongated guide rollers one of each of which is mounted substantially longitudinally to one of the opposite side walls of the truck body such that

movement of the rollers along the guide tracks causes the first or second member to retract within the other member thereby keeping to a minimum the height to which the take-up roll and cover are raised above the truck body, in combination with the other elements recited.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
